SHEPSHED URBAN DISTRICT COUNCIL

ANNUAL REPORT

of the Medical Officer of Health and

Surveyor and Sanitary Inspector

for the Year 1953

By

A. McM. W. SEGERDAL, M.D., D.P.H.

Medical Officer of Health

and

R. B. JONES, Cert. R.S.I.

Surveyor and Sanitary Inspector

SHEPSHED URBAN DISTRICT COUNCIL

Medical Officer of Health's Report, 1953

Medical Officer of Health:

A. McM. W. SEGERDAL, M.D., D.P.H.

Surveyor, Sanitary Inspector and Water Engineer: R. B. JONES, Cert. R.S.I.

Clerk to the Council: H. W. BERESFORD

Chairman of Council: J. L. HARRINGTON

Public Health Committee: Chairman—P. H. JORDAN

Housing Committee: Chairman—C. W. JORDAN

Mr. Chairman and Gentlemen,

I beg to present my report for the year 1953.

According to the Registrar General's estimate there is a slight increase of population from 6,344 in 1952 to 6,364 in 1953.

The birth and death rates have been adjusted for comparison with England and Wales.

The birth rate has dropped again from 17.7 in 1952 to 15.2 in 1953 and this is slightly lower than that for England and Wales (15.5).

The death rate (6.2) is unusually low and the lowest on record. It is lower than last year (9.9) and lower than that for England and Wales (11.4).

The death rate for infants under 1 year of age (19.8) is lower than that for England and Wales (26.8).

The chief causes of death as in the last few years were from diseases associated with elderly people.

The extension of the water main has been carried out to cover the building programme. The Approval of the Ministry has been obtained for the whole of the area scheme to improve the water supply of the southern and Forest sections of the district.

The extension and improvement of the Sewage Disposal works was completed.

The examination of samples of ice cream was satisfactory, and all premises have a high degree of cleanliness.

During the year 47 new houses were completed, making a total of 348 houses completed in the Post War Period, 290 of these houses being completed by the local authority.

The total number of applicants for Council houses at the end of the year was 264 and the number of applications received was 62. The reduction of figures for applications was due to reregistration, and these figures now represent bona fide applicants.

343 cases of infectious diseases were notified. 256 Measles, 44 Whooping Cough, 22 Scarlet Fever, 12 Pneumonia, 7 Erysipelas, 1 Food Poisoning, 1 Puerperal Pyrexia. There were no deaths, and 10 cases of Scarlet Fever were admitted to Hospital. Measles was prevalent in January, February and March and Whooping Cough in June, July and August 1953. Scarlet Fever occurred at intervals during the year. This is the first occasion in which a case of Food Poisoning was notified, in this case caused by Salmonella Typhimurium.

2 cases of Pulmonary Tuberculosis were notified during the year, and there were no deaths from Pulmonary Tuberculosis.

There were no cases of diphtheria notified, but it is a disappointment to note that there has been a fall in the number of children receiving immunisation against diphtheria. Unless these figures can be increased there may be a dangerously high percentage of children susceptible to diphtheria in the community.

Again I wish to express my thanks to the staff of the Public Health Department of the County Council for their willing help and co-operation.

Finally I wish to thank Mr. R. B. Jones for his valuable assistance throughout the year and to you, Gentlemen, for your kindness and co-operation.

I am, Gentlemen, Your obedient servant, A. McM. W. SEGERDAL.

SECTION A.

Shepshed is situated in pleasant surroundings on the northern borders of the Charnwood Forest. Its main industries are quarrying, manufacture of hosiery, boots and shoes, bricks and tiles. There is a public park with paddling pool and playground for children.

During the year no industry was notified as having an adverse effect on health.

SECTION B.

General Provision of Health Service for the Area

HOSPITALS

All Hospitals except some private Maternity and Nursing Homes are under the Sheffield Regional Hospital Board. The County Homes for the aged and infirm people are under the County Council, but when they take ill they then become the responsibility of the Hospital Board.

TREATMENT CENTRES AND CLINICS

The Infant Welfare Centre is held at the Adult School Hall, Shepshed, under the County Council. The Tuberculosis Clinic is held at John Street, Loughborough, and is under the auspices of the Sheffield Regional Hospital Board.

AMBULANCE FACILITIES

The County Council is responsible for all ambulance facilities in the County. Colliery accidents are removed by Ambulances provided by the National Coal Board stationed at Nailstone Colliery and Moira Colliery.

NURSING IN THE HOME

All District Nursing and Midwifery in the home is carried out under the auspices of the County Council.

HEALTH VISITING

This work is provided for by the County Council, and is very ably carried out in the area. A Diabetic Health Visitor attends the Diabetic Clinic at the Royal Infirmary, Leicester, and visits the patients in their homes.

LABORATORY FACILITIES

The Public Health Laboratory at Isolation Hospital, Groby Road, Leicester.

The examinations performed on behalf of the district in the County Laboratory are as follows:—

Milk	• • •		48
Ice-cream	• • •		33
Sputa		• • •	34
Faeces and U	Jrine	• • •	20
Miscellaneou	ıs	• • •	8
		Total	143

Generally there is co-operation between the local authority and the services provided by the Executive Council and the Hospital Board, and the tendency is towards closer integration.

SECTION C.

Sanitary Circumstances of the Area

WATER SUPPLY. Filtered water in bulk is purchased from Loughborough Corporation, and is satisfactory in quality and quantity.

Particulars of water supply to dwelling houses in District:

	served direct	Dwellings served by Stand Pipes			served by Water
No. of Houses	Population	No. of Houses	Population	No. of Houses	Population
1797	5742	26 3	620	15	38

The whole of the Urban area with the exception of outlying farms and cottages is served by public supply.

3 wells closed and piped water substituted, as the result of unsatisfactory bacteriological samples.

200 yards of water main extension was carried out to complete building programme, and the approval of the Ministry obtained for the whole of the new scheme to improve water supply to Southern and Forest sections of the district.

SEWAGE DISPOSAL

Number of Cesspools constructed during the year	NIL
Number of Cesspools abolished during the year	20
Total number of Cesspools in district on 31st Dec., 1953	30

The extension and improvement of sewage disposal works was completed during the year.

CLOSET ACCOMMODATION

Total number in district on 31st Dec., 1953:
Privies 30. Pails 172. W.C's 2046.

Converted during year—Privies 6, Pails 43.

The work was carried out under Section 47 PHA 1936. Pail closets are emptied weekly at night by direct labour, and taken to agricultural land.

Domestic refuse is collected weekly by Karrier C.K.3 by direct labour to one crude tip. The whole of the Urban area is covered. Cesspools are emptied by owners.

SANITARY INSPECTIONS OF THE AREA

Total	12	7	1	1

The I case of Food Poisoning, a child of I year and 4 months was due to Salmonella Typhi-murium. Investigation showed that all five other members of the family were carriers, and that the Father of the family had symptons some little time earlier. It is possible that the Father developed the complaint as the result of his food being infected by rats at his work at a brickyard. The carrier state slowly improved but they were still under observation at the end of the year.

Immunisation against Diphtheria
